

Glenn Edward Hamilton-Smith

Frontend Engineer | React | Next.js | TypeScript | 5+ years experience

Address: Andover, Hampshire, SP11

Site: glennhs.co.uk **GitHub:** github.com/GlennHS

Tel: 07572354460 **Email:** glenniumhs@gmail.com **LinkedIn:** www.linkedin.com/in/glennhs

Personal Statement

Frontend-focused Software Engineer specialising in React, Next.js, TypeScript, and C#, with experience delivering scalable, high-performance web applications across government and enterprise environments. Contributed to high-traffic systems, including an international email development SaaS platform and a Home Office maritime border control project used by Border Force. Strong focus on performance, accessibility (WCAG), and maintainable architecture, with a track record of translating complex requirements into robust, user-focused solutions.

Currently developing and maintaining a tech-for-good mobile application with active real-world usage, demonstrating end-to-end ownership across design, development and deployment. Comfortable working across the full stack when required, particularly within .NET-based environments and API integrations. Interested in AI-assisted development and automation, with a focus on building modern applications that are scalable, usable, and reliable. Previously held UK security clearance and enhanced DBS check.

Technical Skills & Competencies

Frontend: JavaScript (ES6+), TypeScript, React, Next.js, Vue, Nuxt, HTML5, CSS3, SASS/LESS, TailwindCSS, Lighthouse Audits

Backend: C#, SQL

Development Practices: Accessibility (WCAG), responsive & mobile-first design, cross-browser compatibility, performance optimisation

Tooling & DevOps: Node.js, Git, React Testing Library, CI/CD (GitHub Actions), ESLint, Webpack, Vite

Employment

Part-Time Verger & Technical Administrator @ St Mary's Church Andover

WordPress | Microsoft 365 | Physical Repairs

June 2025 to Present

- Provide front-of-house support for visitors, parish members and event attendees, handling a wide range of enquiries in a busy public-facing environment.
- Act as the parish's primary technical contact, maintaining laptops and equipment, setting up user accounts and managing permissions through the Microsoft Admin Centre.
- Troubleshoot and maintain AV equipment used for services and events, resolving technical issues for non-technical staff and volunteers.
- Administer and update the parish WordPress website, publishing new job roles, events and staff updates to keep the site accurate and current.
- Handle last-minute operational and technical requests, adapting quickly to changing requirements while maintaining a professional and helpful approach.

Front-End Senior Analyst @ Viable Data

React | NextJS | Kotlin | Expo | NodeJS

November 2023 to August 2025

- Collaborated closely with designers and product owners from the Home Office, HMPO and Border Force while working on a border security project. Worked to implement highly accessible, user-centered designs that conform to GOV.UK accessibility standards.
- Recognized for professionalism, strong work ethic, and a proactive approach to picking up new technologies and tasks, including collaborating effectively with product owners and external developers.

- Worked directly with external contractors and government departments, including the Home Office and Border Control, ensuring timely and effective communication between technical teams and stakeholders.
- Updated and maintained an Android application built in Kotlin for facial recognition, used to showcase our proprietary "LearnID" technology at major security conventions.
- Delivered and maintained robust frontend solutions using React and TypeScript for critical government systems, ensuring clean, maintainable, and scalable code.

Marketing Technology Expert @ Clevertouch Marketing

Salesforce | Marketo | NodeJS | Laravel | PHP | WordPress | Vue

March 2021 to September 2023

- Led communications between our consultancy and clients, subject matter expert on international marketing compliance, including GDPR, DPR, and other data protection laws. Shaped conversations around marketing initiatives and international campaigns for large international companies such as Fujitsu, Legal and General, Orange Business and Aveva.
- Created a Fortune 500's multi-instance, multi-language email preference centre using the postMessage API and JSON config.
- Built internal tools (e.g. translation tool in Node.js with user-friendly UI) saving hours per project and reducing company costs.
- Led internal initiatives for learning and development, upskilling colleagues on Git, NodeJS and Vue. Hosted several "lunch and learns" on project work undertaken.

Junior Software Engineer @ Be Wiser Insurance

C# | Visual Basic | NodeJS | JavaScript

September 10th 2018 to September 10th 2019 (Uni Placement) & September 14th 2020 to March 2021

- Learned C#, VBA and .NET Framework for business use including ODBC connections to an external data source, using Microsoft Access to query an external data source and connecting/querying SQL server via C#/VBA.
- Engineered bespoke software solutions to match an evolving specification as well as maintained existing softwares and identified areas of improvement within existing business processes.

Education

University of Portsmouth BSc Hons Computer Science

September 2016 - July 2020

- Acted as Chair of the Staff Student Council Committee and Student Representative representing students from various faculties and courses. Chairing the council requires good communication skills and an ability to engage with students as well as ensuring minorities and under-represented groups are given a voice.
- Acted as Scrum Master in Agile group project; set up GitHub CI/CD and integrated Slack for team transparency.
- Worked as a resident assistant for two years helping students find services they needed, providing mental health counselling, supporting students in their university journey.

Projects & Achievements

- **Personal Website** - <https://glennhs.co.uk> - Built using Vue / Nuxt / TypeScript / TailwindCSS
- **Personal Blog** - <https://glennhs.co.uk/blog> - Built using Vue / Nuxt / TypeScript / TailwindCSS / NuxtContent
- **FIVE!** - <https://fivefitness.uk> - Tech-for-good self-care habit tracking mobile-first app with real-world users. - Built using React / NextJS / TypeScript / TailwindCSS / Dexie
- **Resident Assistant of the Year 2018 Portsmouth University** - Awarded for care, compassion, going above and beyond for others and ensuring students felt looked after, cared for and knew where they could go to solve their problems and get the guidance/help they needed.
